

**Model:** Nexia R3 **Production date:** 07. Sep. 2018

**Body ID:** XWBTF69V1KA002042 **Mileage:** 6200 KM

**Dealer name:** «ANDIJON AVTOTEHHIZMAT LTD »

**Part name:** Expansion tank cap

**Problem description:** Expansion tank cap defect

### WPAC Warranty Part Analysis Results :

Appearance: The first step is carefully inspected the reservoir tank cap. The cracks, tears of sealing linings, severe abrasion or other mechanical damage were not found.

Functionality: After installing the cap of the expansion tank on the WPAC car, the engine was started, waited until the engine warmed up and began to slowly open the cap. There was a sound of air escaping (as when opening a bottle of carbonated drink), the cap restrains the pressure generated in the system. This indicates its failure. **Defect was confirmed.**
